

If you have ordered the optional Navigation System in your European Delivery, Important Information Follows

The European Delivery Program

Once you have handled the hard part...which BMW model to buy, including the decisions of color and options, then comes the really fun choices. **When** to experience the magic of Europe, **which** country to head for, and **where** to drop off the car for shipment home. The BMW On-board Navigation System can enhance and assist you on your European journey.

If you have Navigation on your new BMW...

The BMW Navigation System will assist you in finding historic sites, relatives who live in remote hamlets, hidden-away five-star restaurants...even an alternate route in case of detours. When you return to the States, your BMW center will install a DVD map for your local area.

If your car has the Navigation System *, here is how you can order a DVD to provide you with a digital road map that will show you at the touch of a button everything worth knowing about the sights registered in the system. Many customers have shared their driving adventures with us and comment about how much easier it is to have the navigation system do the work. In the past, the Munich Delivery Center has stocked these DVD's in the small boutique located on site. However, we have been advised that they will no longer carry them. So if you are planning to purchase a navigation DVD, please do so prior to leaving for Munich – the cost of purchasing them here in the U.S. is substantially lower than purchasing them in Europe.

Here's how you can order an All Europe DVD for your Navigation System:

- Customer orders the All Europe DVD by calling 1-888-628-6277
- Order the correct DVD.
- Cost: \$165 per DVD, plus shipping & processing and applicable tax. (\$9.95 for 2-day FedEx)
- FedEx Next Day and Saturday delivery available at an extra charge
- Delivery is direct to customer's designated U.S. address
